[strat logs from 2011-06-10 RIFS report.pdf](#)
[2013-09-20 Phase 1A stratigraphy logs.pdf](#)

I'm wondering if we should wait until we have a few things that might help our discussion. When I spoke with Adam last Friday, he said they have contour maps of all of OU1 that they can share with us. He's out this week so I haven't seen anything yet. They probably only have TCE, benzene and VC so far, but they could do OU1 contour maps of all contaminants that have been detected. Adam also mentioned that they can share their data management program with us – it sounds like you can click on locations to pull up the strat logs, in addition to chemical data, so I think it would help put all the information at our fingertips.

Adam may or may not be on the call tomorrow, but we can ask how long until these things will be available, and then decide when to have our discussion. It doesn't seem like it is that much work for them to get that stuff together.

BTW – to the best of my knowledge, all the strat logs are in 1 of 2 places: pre-2012 are in the draft RIFS, and post-2012 are in the draft Phase 1A report. I extracted those pages and they are attached. Brett, if you are aware of any others, let me know.

Scratch the 6th – Peter has a conflict.

Is there a day and time next week that works for everyone? A quick look at our Outlook calendars shows Peter and I can meet anytime next week except for Thursday.

Leslie,

Peter and I will be looking over the source area ground water data along the perimeter of OU1 in preparation for when we go over the information together. Would you like to go over the data collectively on our next regulator's call (Thurs. March 6th)?

Maddie
